sensitive feet

CERTIFIED
NATURAL PRODUCT

TRUST IN OUR TRADITIONAL BRAND QUALITY

Targeted foot care since 1962: peclavus®. Even though there were only very few specific care products to begin with, over the years peclavus® became a brand well-known for its care and treatment range with over 125 different formulations covering almost all requirements of foot, body, hand, and nail care. peclavus® has a tradition as a quality label. This brochure provides useful information on the PODDiabetic range.

PUT YOUR BET ON NATRUE-CERTIFIED PRODUCTS

All certified peclavus® natural cosmetics are certified by NATRUE, the international quality label for genuine natural organic cosmetics. Throughout the world, this label is only awarded to products meeting NATRUE's exceptionally high standards of naturalness and quality, for example:

WITHOUT

- synthetic fragrances or dyes
- ingredients from petrochemicals such as paraffins (synthetical preservatives) or PEGs (synthetic emulsifiers)
- silicone oils
- irradiation of end products or herbal ingredients
- genetically modified ingredients
- animal testing, also outside of EU
- harmful propellants

WITH

- natural and organic ingredients
- ingredients that can be returned into the cycle of nature
- sustainable production process

TAKE ADVANTAGE OF ECO-CONSCIOUS PRODUCTION

The skin is not only our largest sensory organ, it also has enormous self-healing powers. The aim of the peclavus® development is to support these self-healing powers in a natural way. Very antiallergic and skin-friendly products are ensured by manufacturing processes where we place particular emphasis on environmental impact, modern filling lines and uncompromising standards of hygiene and quality control.

FINDING YOUR IDEAL PRODUCT MADE EASY

The new peclavus® icons provide a simple and clear overview of the products' application types and areas, respectively. Additionally, you can see at a glance whether or not a product is vegan or a natural cosmetic product certified by NATRUE:

GENTLE CARE FOR SENSITIVE FEET

Sensitive feet require gentle care – irritant-free and natural. Especially suited for diabetics, for psoriasis or similar skin conditions which require ultimate sensitivity.

TREAT YOURSELF TO MORE NATURAL MOISTURE

Older people and diabetics in particular suffer from sensitive and dry skin that can develop cracks on the feet. It is these sensitive parts that should receive extra care with products from the peclavus® PODODiabetic range as they were specifically developed for dry and sensitive skin and offer additional moisture thanks to urea or tea tree oil.

SENSITIVE SKIN

DRY SKIN

100 % VEGAN

CERTIFIED NATURAL PRODUCT

TEA TREE OIL FOOT CREAM TEA TREE OIL, USNEA EXTRACT

peclavus® PODODiabetic tea tree oil foot cream is especially developed for diabetics with sensitive feet. This is a highly effective combination of soothing tea tree oil, caring usnea extract, as well as antiseptic arnica extract and lavender oil to provide lasting skin protection. Without leaving a greasy film, it can also help to prevent dermal fungus. Skin tolerability clinically confirmed.

5440302 | 100 ml

VERY DRY SKIN

UREA FOOT CREAM UREA 10%

Lasting, immediate relief for very dry skin can be achieved by peclavus® PODODiabetic urea foot cream. This moisture-regulating cream with 10% urea and algae extract for a real penetrating effect and moisture retention. Precious avocado oil supports the skin's own barrier function, natural sea buckthorn pulp oil enhances lipid metabolism. Effective skin care for sufferers of atopic dermatitis and diabetic feet. Skin tolerability clinically confirmed.

GOOD TO KNOW

DIABETIC FEET

Feet of diabetics are sensitive and almost always extremely dry. Diabetics are prone to neural damage and thus the feeling of pain – e.g. occurring from cracks on the feet caused by overly dry skin – can be impaired. Often, resulting inflammations cannot be perceived. For this reason, it is very important for those affected to regularly consult with their foot care specialists to control their feet. Additionally, it is important to continue the care at home, preferably with irritant-free care products with moisture-regulating effects. The

peclavus® PODODiabetic range with precious ingredients like micro silver, tea tree oil, and urea is a perfect match. All products have been tested specifically for diabetics and neurodermatitis patients and have yielded "very good" test results. Look out for the "dermatest" label on the packaging.

GENTLE AND RELIABLE PROTECTION AGAINST INFLAMMATION AND UNPLEASANT FOOT ODOUR

The peclavus® silver products are high-grade care products, unique both in their composition and their effectiveness. This is especially true when preventing inflammation and unpleasant foot odour is of concern. Effective but also particularly gentle.

GOOD TO KNOW

EXPERIENCE SILVER CARE

Silver ions derived from micro silver have the ability to protect the skin from micro-organisms and deprive bacteria and fungi of their breeding ground. Diabetics often suffer from a weakened skin barrier, making it extremely prone to the attacks of fungi and bacteria. The products of the peclavus® silver range provide effective help to stabilize the immune system, control itchiness, and soothe skin irritations. Microsilver containing care products are generally suited for all skin types. Products with micro-silver are especially suited for persons suffering from dry, impure, or sensitive skin. Micro silver also has an excellent effect on neurodermatitis and foot odour. **IMPORTANT:** Micro silver is larger than human skin pores. For this reason, it cannot penetrate deeper skin layers and acts only where it is supposed to act. So it significantly differs from nano silver, which is much smaller and controversially discussed because it can influence cell structures. This is why it is not contained in peclavus® natural cosmetics products.

GOOD TO KNOW

BISABOLOL

BISABOLOL

Bisabolol occurs naturally in the essential oil of chamomile. The isolated active ingredient is frequently used because it is gentle on skin and less allergenic than chamomile extract. Bisabolol is a natural agent that is used against bacteria and fungi. For sensitive, blemished and inflammation-prone skin. The liquid is colourless to light yellow and can be dissolved in alcohol and oil.

INGREDIENTS

JOJOBA OIL

SIMMONDSIA CHINENSIS SEED OIL

Extracted from seeds of the jojoba shrub by cold pressing. It provides an excellent raw material for creams, lotions, massage oils, and skin nourishment oils. Regenerates, retains moisture, and soothes. The skin quickly absorbs this liquid wax. Very good skin compatibility.

CACAO BUTER

THEOBROMA CACAO (COCOA) SEED BUTTER

Particularly suitable for sensitive, irritated and dry skin. It has a calming and lipid regulating effect, leaving a protective and moisture-retaining layer on the skin.

LAVENDER OIL

LAVANDULA ANGUSTIFOLIA OIL

Obtained from gentle distillation of lavender flowers. Calming, soothing, and uplifting. It provides a light antiseptic effect which is particularly recommended in combination with tea tree oil and manuka myrtle, e.g. for athlete's foot.

ALMOND OIL

PRUNUS AMYGDALUS DULCIS OIL

Obtained from the sweet stone fruit of the almond tree. This oil is a mild vegetable oil with smoothing and lipid regulating properties. Its structure resembles the skin's upper lipid layer and is therefore particularly well absorbed.

INGREDIENTS

MICRO SILVER

SILVER

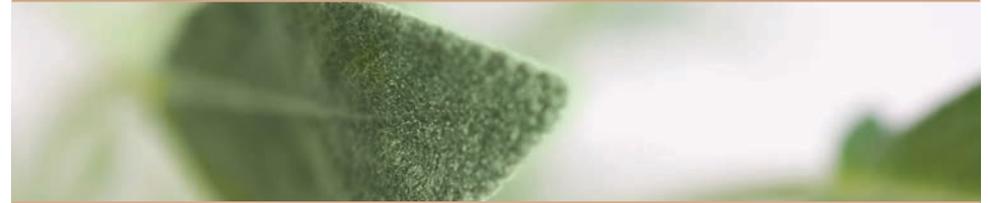

Protects against micro-organisms and deprives bacteria and fungi of their breeding ground. Particularly suitable for dry, impure, and sensitive skin and atopic eczema, also safe for diabetics. IMPORTANT: Micro silver is not to be confused with nano silver which is being controversially discussed and therefore not included in any peclavus® products.

SEA BUCKTHORN FRUIT OIL

HIPPOPHAE RHAMNOIDES

Naturally obtained oil from the pulp of the sea buckthorn fruit. It is rich in palmitoleic acid, carotinoids, vitamin A and E and has cell regenerative and antioxidant properties. Suitable for all skin types.

SAGE OIL

SALVIA OFFICINALIS OIL

Essential sage oil, obtained from the herb by steam distillation. Has an antiseptic and astringent effect, and regenerates and deodorizes.

TEA TREE OIL

MELALEUCA ALTERNIFOLIA LEAF OIL

Tea tree oil is obtained from the plant's leaves by steam distillation. Its highly effective antiseptic and soothing properties provide a broad field of applications.

UREA

UREA

Urea (synthetic urea) speeds up the removal of hard skin, softens and increases the moisture content of the skin. The correct dosage is decisive, because if the concentration is too high (approx. 40% and higher), it has a keratolytic effect and destroys the skin's corneal layer.
