In elegant design, equipped with every option that treatment specialists and beauty salons need today, this wax warming pot gives every salon the ability to increase its efficiency and broaden its service range.

The wax warming pot is thermostatically controlled and ideal for use with many different types of depilatory wax.

DESIGN FEATURES AND FUNCTIONS

1. The lockable base plate can be removed and fastened to the top as a protective ring
1. Fixed protective ring on the top – to better protect the insert
3. On/Off switch for the power supply
4. Power supply indicator light
5. Indicator light for the thermostat
6. Temperature control knob
7. Safety handle for easy handling of the wax warming pot
8. Lockable lid
9. Removable insert with handle and wiping element

INSTRUCTIONS FOR USE

Please carefully read the following instructions for use before starting to use the wax warming pot.

Before using the pot for the first time, you should ensure that the mains power characteristics match the values quoted on the rating plate. The device and mains cable should not be damaged.

IF THESE INSTRUCTIONS ARE NOT HEEDDED, THE GUARANTEE WILL LAPSE AND WE CANNOT ACCEPT LIABILITY!

DECLARATION RELATING TO THESE INSTRUCTIONS FOR USE

Hellmut Ruck GmbH reserves all rights to modify and supplement these instructions for use. Hellmut Ruck GmbH has taken great care to keep these instructions free of inaccuracies and omissions. Please contact us if you find mistakes or inaccuracies. However, Hellmut Ruck GmbH assumes no liability for mistakes in these instructions for use or consequential damage resulting from the provision of these instructions for use or their application when using the product.

These instructions for use must not be disseminated or supplemented without the express approval of Hellmut Ruck GmbH.

The manufacturer cannot be made responsible for damage that is caused by use that deviates from the intended use or failure to comply with the safety instructions and warnings.

ABBREVIATIONS AND SYMBOLS

This symbol identifies a potential point of danger for people or for the device itself. It must be taken note of.

**This symbol identifies useful advice.
Additional information about the product and how to use it is provided here.**

**Observe the disposal
notice**

SAFETY NOTICES

Do not immerse the wax warming pot in water or use it in an area where there is a risk of water splashing onto it.

Prior to cleaning, always unplug the device and use only a small amount of cleaning agent.

The heating element of the wax warming pot gets very hot. NEVER move the wax warming pot during operation.

NEVER switch on the wax warming pot if it does not contain wax.

OPERATION

Remove the lid and take out the insert.

Attach the protective ring to the top edge of the wax warming pot.

Fill the insert with a sufficient amount of wax beads of your choice OR put in a can of wax instead of the insert.

After ensuring that the electrical power supply specifications of 230 V/50 Hz are fulfilled, connect the wax warming pot to the power supply and press the On/Off switch. The red indicator light indicates operation.

Turn the temperature control knob clockwise to the desired heating level, which depends on the type of wax chosen. The yellow thermostat display remains illuminated until the selected temperature level has been reached. The thermostat automatically turns the heater on and off to maintain the selected temperature.

To increase the temperature level, turn the control knob clockwise; to decrease it, turn it the other way.

Never put wax DIRECTLY into the heating container – only the insert may be used to heat wax. Plastic containers also should not be placed in the heating container.

The user should check the temperature of the wax before each application!

RECOMMENDATIONS

Once you have found the optimal working temperature for your wax type, we recommend that you note the position of the temperature control knob or keep it in the same position and just press the On/Off switch.

To ensure optimum flexibility, the wax must be heated in the removable insert. For increased flexibility, additional inserts can be purchased separately.

To prevent loss of valuable working time, we recommend that you switch on the wax heater approx. 30 minutes before starting the treatment. This ensures that the wax reaches the correct temperature and consistency for treatment.

CLEANING

This wax warming pot should only be cleaned with specially designed wax cleaning agents (e.g. art. no. 4080701 RUCK® beautykultur Equipment Cleanser). With regular use of these cleaning agents, the wax warming pot will remain in excellent condition. Never use alcohol or ethyl alcohol, since these corrode the plastic and can cause damage.

Never use any other solvents, as these could damage the heating container and cause toxic gases to be emitted during operation.

Splashed wax on the casing should be removed as quickly as possible. Dry wax remnants are harder to remove. It is especially important that the On/Off switch be kept free of wax.

After use, pull the insert out of the heating container and use the special paraffin/wax cleanser to carefully remove all wax residues from the surfaces, especially from the insert and the heating container.

SPARE PARTS

Art. no. 30120 RUCK® Wax Warming Pot Insert

Art. no. 4080701 RUCK® beautykultur Equipment Cleanser

Please contact **RUCK SERVICE** for additional spare parts.

DISPOSAL

Environmental hazard!

Incorrect disposal endangers our environment

Please use available return and collection systems for disposing of the wax warming pot at the end of its service life.

We reserve the right to make changes to and deviations from the technical design.
