Effective alleviation
of foot problems

TRUST IN OUR TRADITIONAL BRAND QUALITY

Targeted foot care since 1962: peclavus®. Even though there were only very few specific care products to begin with, over the years peclavus® became a brand well-known for its care and treatment range with over 125 different formulations covering almost all requirements of foot, body, hand, and nail care. peclavus® has a tradition as a quality label. This brochure provides useful information on the PODomed range.

TAKE ADVANTAGE OF ECO-CONSCIOUS PRODUCTION

The skin is not only our largest sensory organ, it also has enormous self-healing powers. The aim of the peclavus® development is to support these self-healing powers in a natural way. Very antiallergic and skin-friendly products are ensured by manufacturing processes where we place particular emphasis on environmental impact, modern filling lines and uncompromising standards of hygiene and quality control.

GOOD TO KNOW

TRUST IN THE POWER OF NATURE

The nature's diversity is simply unique. Therefore, the peclavus® PODomed product range trusts in natural ingredients and their powerful effect. This ranges from the spirulina algae with its protective enzymes against fungi and bacteria and skin soothing papaya to the bark extract for the softening of hard skin.

FINDING YOUR IDEAL PRODUCT MADE EASY

The peclavus® icons provide a simple and clear overview of the products' application types and areas, respectively. Additionally, you can see at a glance whether or not a product is vegan.

EFFECTIVE ALLEVIATION OF FOOT PROBLEMS

Whether mycoses, warts or ingrown nails, this medically oriented product range offers effective help and relief for the foot carers' daily routine. For an effective and successful treatment.

TREAT NAIL FUNGUS TO PREVENT SKIN FUNGUS

Infections with nail fungus are not only a cosmetic issue. A worst case scenario of untreated nail fungus is the loss of the entire nail. Immediate treatment is important to prevent nail fungus from spreading on to the skin and consequently causing skin fungus. This is best done with special nail fungus products from the peclavus® PODomed range.

NAIL FUNGUS

ANTIMYX TINCTURE PIROCTONE OLAMINE

peclavus® PODomed AntiMYX tincture contains piroctone olamine and offers optimum protection against skin and nail fungus. Additional germ-inhibiting and anti-fungal components like bisabolol, tea tree oil, and rosemary oil have a soothing effect and promote the skin's natural protective function. Best combined with peclavus® PODomed AntiMYX foot cream.

ANTIMYX PROTECTOR STICK BLUE CYPRESS OIL, LAVENDER OIL, TEE TREA OIL

peclavus® PODomed AntiMYX protector stick is a highly effective product that is very easy to apply. Ideal for regenerating discoloured and damaged nails and even fungal infections. The special carrier-system transports the active ingredients through the nail plate down to the matrix. The complex interaction of essential oils such as tea tree, lavender and blue cypress have been proven through analyses. peclavus® PODomed AntiMYX foot cream is well suited as supporting skin care.

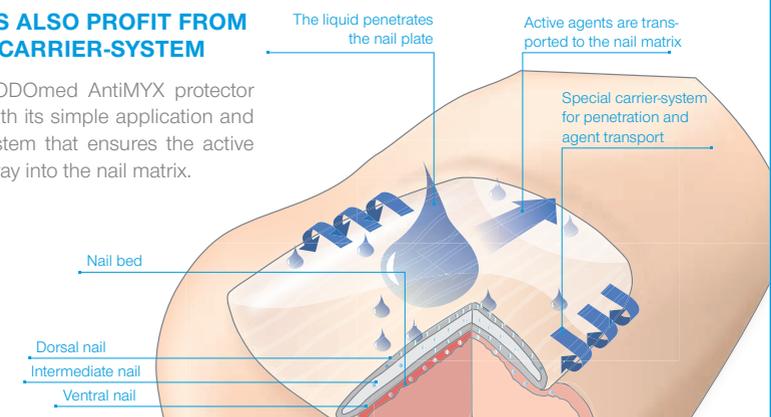

5420601 | 4 ml

GOOD TO KNOW

FUNGAL NAILS ALSO PROFIT FROM THE SPECIAL CARRIER-SYSTEM

The peclavus® PODomed AntiMYX protector stick convinces with its simple application and special carrier system that ensures the active agents find their way into the nail matrix.

1 DROP
ENOUGH FOR 10 NAILS

NAIL FUNGUS,
MRSA-PROTECTION

SPIRULINA LOTION
SPIRULINA-ALGAE

Using the power of algae to fight damage to nails, peclavus® PODOmed spirulina lotion contains the enzyme protection of spirulina blue algae. Ideal for mycosis prophylaxis and regenerating distorted nails thanks to very good penetration through the nail plate. The valuable substances in Spirulina blue algae have been found to increase cell activity, penetrate the nail and therefore act on the nail bed too. With MRSA protection.

5420701 | 20 ml

GOOD TO KNOW

TRUST IN SPIRULINA ALGAE'S PROTECTIVE ENZYMES

Spirulina algae has been in existence for more than 3.6 billion years now. This makes it one of the oldest, living organisms on this planet. Its survival to this date is owed to its remarkable defensive properties against its natural enemies like bacteria, fungi, and viruses. This algae profits from exceptional cellular protection and accelerated cellular repair mechanisms. Dermal cells can highly profit from exactly these characteristics; i.e. defence against fungi and viruses, cellular protection, as well as accelerated cellular repair. How does the micro algae actually do it? Specific sugar molecules protect healthy skin cells from viruses. Viruses can only proliferate if they get access to healthy skin cells to use them as host cells for their replication processes. In the same way, the spirulina algae highly effectively protects against fungi and bacteria. This is achieved with the help of own protective enzymes, among others.

ALSO PERFECTLY SUITED AGAINST SKIN FUNGUS, PRURITUS, AND INFLAMMATIONS!

ANTISEPTIC

TEA TREE OIL

peclavus® PODOmed tea tree oil is a very special essence with various fields of application. It has an antiseptic and soothing effect. 100% pure Australian tea tree oil. Important: Do not allow undiluted oil to come into contact with mucous membranes and keep away from children!

5420801 | 10 ml

GOOD TO KNOW

CONSIDER THE THREE SUCCESS FACTORS OF SUCCESSFUL FUNGAL NAIL TREATMENT

1. Regular foot care appointments to remove thickened and infected nail material to prevent further proliferation – consult with your foot care specialist.

2. Use a suitable product twice per day on the entire fungal nail, e.g. AntiMYX Protector Stick with its special carrier system to achieve an in-depth effect. After four weeks apply once/day – preferably in the evening.

3. Be persistent in your product use – until the affected nail is fungus-free and fully grown back.

QUICKLY APPLY EFFECTIVE MEASURES AGAINST SKIN FUNGUS

Whether the skin is red, itchy, has a burning sensation, scales, or blisters: skin fungus in feet comes in many forms and is most likely to initially occur between the toes. If a contagious fungal infection remains untreated it can spread over the toes to the edges of the foot, causing painful skin cracks. For this reason, a timely diagnosis and treatment is indispensable. In the practice, using the peclavus® PODOmed AntiMYX foot cream has proven to be highly effective.

PROMOTE YOUR SKIN'S SELF-HEALING CAPACITIES FOR WART TREATMENT

Often, warts are harmless growths of the skin that often vanish at their own accord. To support and promote the skin's self-healing capacities, a special active ingredient complex has been developed for the peclavus® PODOmed AntiVERUX cream. It contains a concentrate of arthrospira microalgae, among other high-grade ingredients. This offers an important precaution with measurable results - try and see for yourself.

SKIN FUNGUS

ANTIMYX FOOT CREAM PAPAYA EXTRACT, BISABOLOL

peclavus® PODOmed AntiMYX foot cream alleviates skin itchiness and irritation. The special combination of ingredients cools and relaxes the skin – ideally suited for skin mycoses. Here, the papaya's highly active enzyme papain fully unfolds its enormous scope of effectiveness. Bisabolol supports the anti-fungal properties of this quickly absorbed cream. The skin is more supple and moisture-regulated whilst not becoming over-greasy. peclavus® PODOmed AntiMYX protector stick is well suited as supporting nail care.

5420901 | 30 ml
5420902 | 100 ml

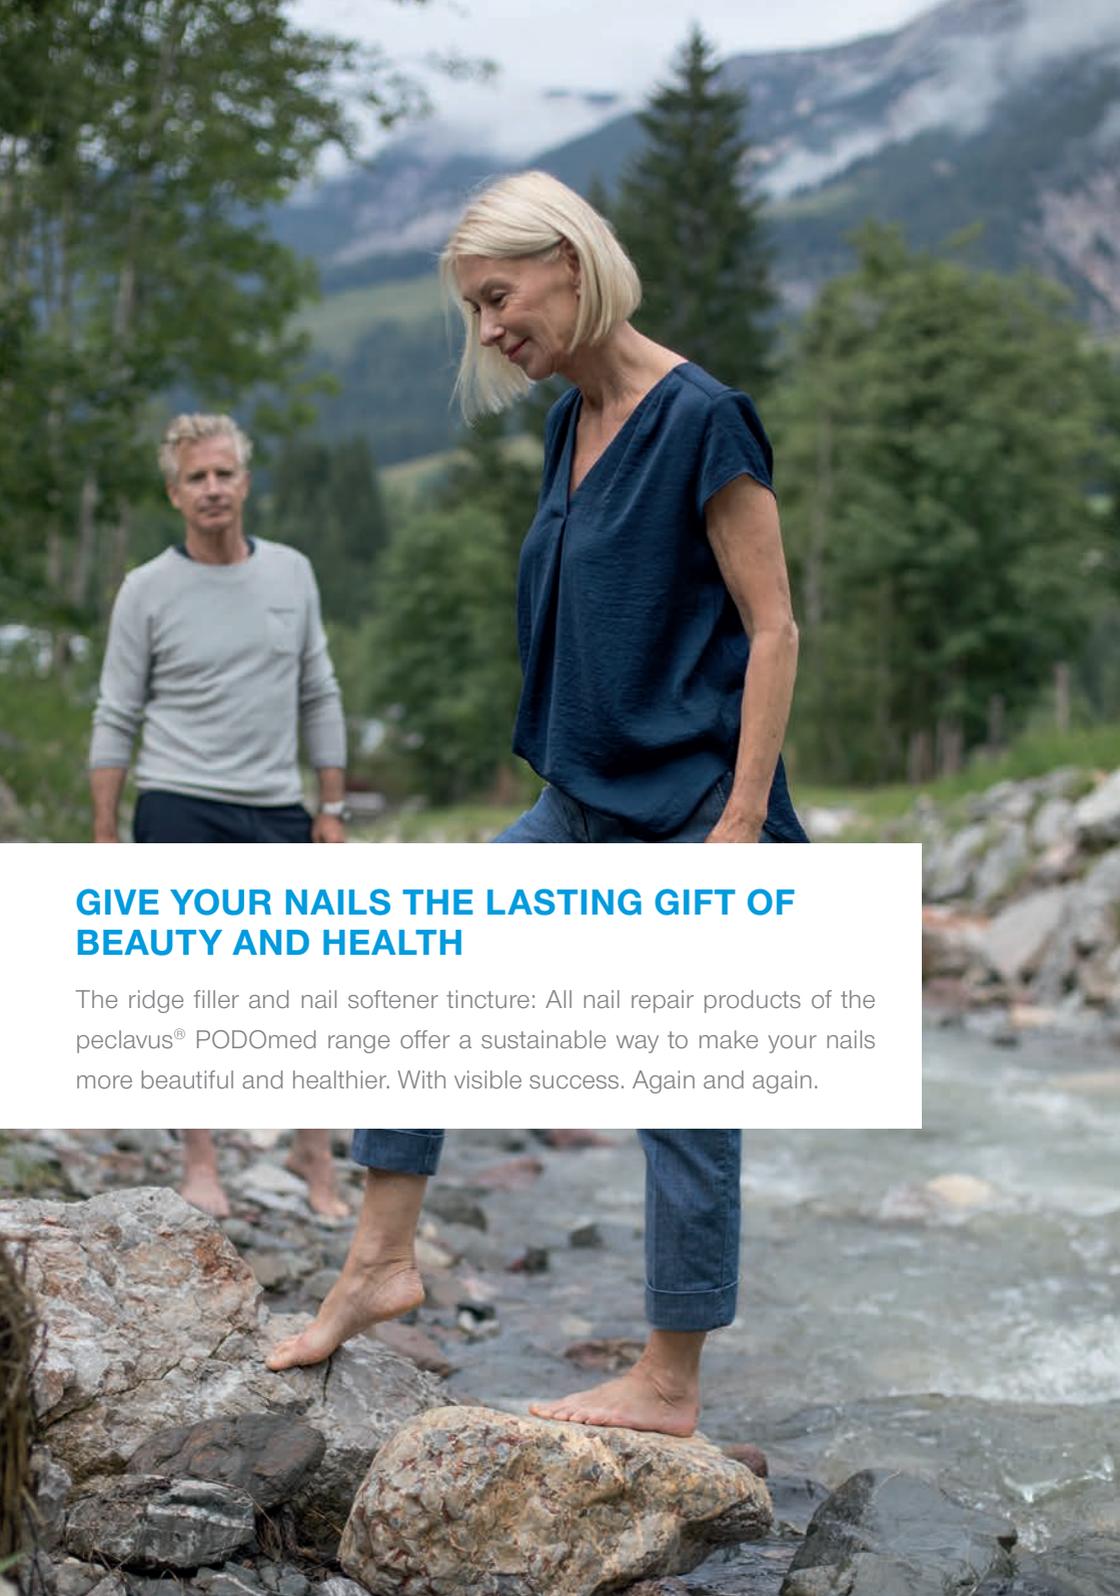

WARTS

ANTIVERUX CREAM SPIRULINA ALGAE

Thanks to its special mix of active ingredients peclavus® PODOmed AntiVERUX cream regenerates and protects skin that is prone to warts. This highly effective cream, containing Spirulina blue algae, visibly improves the skin's appearance and offers anti-viral protection.

5421001 | 10 ml

GIVE YOUR NAILS THE LASTING GIFT OF BEAUTY AND HEALTH

The ridge filler and nail softener tincture: All nail repair products of the peclavus® PODOmed range offer a sustainable way to make your nails more beautiful and healthier. With visible success. Again and again.

NAIL REPAIR

RIDGE FILLER

peclavus® PODOmed ridge filler provides an effective instant relief to brittle nails. It improves the nail structure, smooths out unevenness, and prevents chapped nails. It makes the nails even, resistant, and elastic.

5421201 | 10 ml

NAIL SOFTENER TINCTURE GLYCERINE, BISABOLOL

peclavus® PODOmed nail softener tincture is the quick solution to in-growing nails, hardened skin and sensitive cuticles. Hard nail edges are quickly softened and painful pressure disappears. The perfect preparation to cutting hard and thickened nails. Ideal as a pre-treatment for hardened skin and dry cuticles. Contains nourishing glycerine and bisabolol. When suffering from in-growing nails speak to your foot care specialist.

5421701 | 20 ml

GOOD TO KNOW

BISABOLOL BISABOLOL

Bisabolol occurs naturally in the essential oil of chamomile. The isolated active ingredient is frequently used because it is gentle on skin and less allergenic than chamomile extract. Bisabolol is a natural agent that is used against bacteria and fungi. For sensitive, blemished and inflammation-prone skin. The liquid is colourless to light yellow and can be dissolved in alcohol and oil.

REDUCE HARD SKIN, CALLUSES AND PRESSURE POINTS

Hard skin and pressure points are not only an aesthetic issue but also a painful one, e.g. when pressure points develop into corns. Often, cracks also form, providing easy access for bacteria and fungi. Now it's high time to take action with peclavus® PODOmed anti-callus balm and get into a daily skin care routine.

SUPPORT WOUND HEALING THE NATURAL WAY

Be it on the feet or on the body – small injuries are quite common in every day life. A healthy body replaces damaged tissue with new one. Help your body with a nature-based support. The peclavus® PODOmed ozone cream with natural olive oil for example is a proven remedy to support the healing process of irritated skin. Use it for small injuries of the nail fold or dry, cracked skin areas – a top insiders' tip is to also use the cream for scar care.

CALLUS

ANTI-CALLUS BALM NATURAL SALICYLATES

peclavus® PODOmed anti-callus balm provides a gentle and lasting relief for calluses, cracks and pressure points. Natural salicylates effectively reduce calluses and are perfectly complemented by precious natural extracts of almond and jojoba oil. This is a real nourishing and soft treat.

PROMOTION
HEALING PROCESS100 %
VEGAN

OZONE CREAM

peclavus® PODOmed ozone cream is ideal for promoting healing processes if the skin is irritated, especially in the nail fold. Also suited for spraying tamponades. The cream is antibacterial, stimulates tissue growth and liquefies when warmed by the skin's natural heat, allowing it to penetrate deeper. Based on natural olive oil enriched with biologically available ozone.

5421901 | **15 ml**

ANTIBACTERIAL

100 %
VEGAN

ANTIBAC SILVER TINCTURE MICROSILVER BG®

Thanks to antibacterial MicroSilver BG® the AntiBAC silver tincture normalises the skin flora. The skin is effectively protected by antiseptic lavender and tea tree oil, soothing clove leaf oil and organic aloe vera. Ideally used after treatment to prevent inflammation.

5420501 | 20 ml

GOOD TO KNOW

EXPERIENCE THE ANTIBACTERIAL EFFECT OF MICROSILVER

Silver ions derived from micro silver have the ability to protect the skin from micro-organisms and deprive bacteria and fungi of their breeding ground. Thanks to the antibacterial effect of microsilve skin irritations can be soothed or prevented. **IMPORTANT:** Microsilver is larger than human skin pores. For this reason, it cannot penetrate deeper skin layers and acts only where it is supposed to act. So it significantly differs from nano silver, which is much smaller and controversially discussed because it can influence cell structures. This is why it is not contained in peclavus® natural cosmetics products.

AUSTRALIAN BLUE CYPRESS OIL

CALLITRIS INTRATROPICA OIL

The moisturising properties of this extract obtained from careful steam distillation were already known to the ancient aborigines. This oil is especially skin-friendly, free of harmful stimuli, and has a long-lasting effect on skin conditions like warts and mycoses.

LAVENDER OIL

LAVANDULA ANGUSTIFOLIA OIL

Obtained from gentle distillation of lavender flowers. Calming, soothing, and uplifting. It provides a light antiseptic effect which is particularly recommended in combination with tea tree oil and manuka myrtle, e.g. for athlete's foot.

PAPAYA

CARICA PAPAYA FRUIT EXTRACT

Papaya's kernels are rich in proteolytic papain enzyme. This has also a tremendous effect when applied externally. Calms, cools, and relaxes the skin.

TEA TREE OIL

MELALEUCA ALTERNIFOLIA LEAF OIL

Tea tree oil is obtained from the plant's leaves by steam distillation. Its highly effective antiseptic and soothing properties provide a broad field of applications.

WILLOW BARK EXTRACT

SALIX ALBA BARK EXTRACT

Contains tannins, flavonoids, and salicin. Antiseptic and keratolytic. Applied particularly in hard skin softening products. Natural salicylate.
